

Nutriga Su-rin

(Dietary Supplement Product)
(NUTRINAL (TM))

“Prevention is better than cure.”

Prevention + Cure

Nutraceuticals refer to nutrients derived from food sources with health benefits.

Nutraceuticals are the hybrid of “Nutrition” from food and “Pharmaceutical” from medicine.

Nutraceuticals are defined as a “food, or parts of a food, that provide medical or health benefits including the prevention and treatment of disease”

according to Dr. Stephen De Felice – the Founder and Chairman of the Foundation for Innovation in Medicine (FIM).

Nutrients

- Low efficiency
- Weak results
- No effect of physical intervention
- Prevent some diseases
- Long-term results
- Limited empirical evidence

Pharmaceuticals

- High efficiency
- Targeted therapy
- With effect of specific physical intervention
- Cure some diseases
- Short-term results
- Massive empirical evidence

Reduce sugar level in blood

Help boost burning fat and sugar to reduce risk of diabetes

Boost immunity

Rich in antioxidants

Reduce inflammation

Help reduce infection

Diabetes

Nutriga Su-rin

Caused by a disorder in the body that produces insufficient insulin, causing the body to not be able to use sugar efficiently, causing the level of sugar in the Tumor raised In the long run, it will result in the destruction of blood vessels and lead to complications of more severe diabetes.

Normal people

After eating, carbohydrates and sugar turn into blood sugar that circulates in your bloodstream.

Then, the pancreas releases insulin to regulate sugar (glucose) level allowing the body to balance its metabolic needs.

Diabetic patients

After eating, carbohydrates and sugar turn into blood sugar that circulates in your bloodstream.

BUT insulin resistance causes pancreas to be unable to regulate insulin and use glucose, resulting in high blood sugar level.

Diabetes is a **leading cause of death**, killing **200** people in every **8** hours.

In Asia, young adults are found to have higher risk of diabetes due to the changing lifestyle.

Complications of Diabetes

90% of diabetes patients have high risk of complications

- Risk of stroke
- Risk of and narrowed arteries and heart attack
- Risk of diabetic retinopathy
- Risk of kidney
- Risk of severe nerve damage, causing feeling loss of the feet

Diabetes Risk Factors

- Age of 35 and over
- Overweight, BMI > 25, having family history with diabetes
- High blood pressure and blood sugar level
- At risk of cardiovascular disease
- Low physical activity, having belly fat

How to prevent risk of diabetes

Control the weight and balance diet

Eat healthy with 5 food groups

Have diabetic screening test annually

Exercise regularly, 30-60 minutes each time

Avoid drinking alcohol

Key ingredients in Nutriga Su-rin

BITTER MELON

From the studies in Japan, the United Arab Emirates, and India, it was found that bitter melon helps a mechanism of regulating blood sugar by having Charantin and Vicine that act as follows:

- Insulin-like action
- Helps the pancreas secrete insulin
- Helps Increases the use of glucose in the liver
- Helps inhibit glucose synthesis
- Helps prevent cataracts that can be a complication of diabetes

BETA-GLUCAN FROM YEAST

β -1,3/1,6-glucans found in fungi and baker's yeast called "Yeast Beta Glucan" have the following benefits:

- Helps control blood sugar levels
- Helps prevent infection
- Helps lower cholesterol
- Have as antioxidative function
- Helps boost immunity system
- Help reduce inflammation

EMBLICA (Indian gooseberry)

It is rich in various nutrients including flavonoids, polyphenols, and tannins.

- Helps promote metabolism of sugar and fat
- Helps reduces blood sugar level
- Helps balance blood circulation

GINSENG

Known as "King of Herbs" imported from China containing Saponin or Ginsenoside

- Helps reduce the risk of diabetes
 - Helps promote secretion of insulin
 - Helps lower blood sugar levels
 - Helps reduce the development of diabetes
- Helps promote metabolism of sugar and fat
- Helps balance blood circulation

TURMERIC

Known as "Wonder of drugs" containing curcumin that is beneficial to the body from the studies in various countries.

- Helps lower blood sugar levels
- Helps reduce the risk of developing diabetes
- Helps reduce other diabetes-related complications
- Helps reduces inflammation

BLACK PEPPER

It has been regarded as the king of spices with its spicy taste.

- Helps regulates blood sugar levels
- Helps reduce stress
- Helps reduce inflammation
