SENSITIVE+
FEMININE WASH

pH value that is suitable for hidden spots
should be between 3.8 - 4.5

Cleaning Products for Hidden Spots

It contains Lactic Acid and Sodium Lactate to help maintain the pH Balance that suitable for the skin. Arisaema amurense extract, the Nobel Prize in 2016 as an Innovative Whiten-er, together with Sugar Maple Extract, helps skin look brighter. Aloe Vera Extract helps reduce inflammation and irritation to the skin. Chamomile and Portulaca extracts add moisture to the skin and help prevent skin allergies.

KEY INGREDIENT

Arisaema Amurense Extract

This extraction won the Nobel prize in 2016. It helps to brighten skin naturally and inhibits melanin production. It also reduces the enzyme tyrosinase. Thus, the skin will become whiter and more radiant.

Portulaca Extract

Rich in Vitamin A, C, E and Coenzyme Q10, effective in reducing irritation of soft skin and helps relieve itching.

Aloe Vera Extract

Helps reduce inflammation and skin irritation while leaving skin softer and more hydrated.

Chamomile Extract

Gentle on the skin with the effect of reducing the accumulation of bacteria and reducing skin irritation.

Sugar Maple Extract

It's similar to natural AHAs. However, it gently helps to exfoliate for a more even and healthy skin tone.

Lactic Acid

Adjust the acid-base balance of the skin, moisturizing & help exfoliate skin cells.

Sodium Lactate

It works with lactic acid to enhance its effectiveness and provide moisture to the skin.

How To Use:

Pour Giena Sensitive Feminine Wash appropriately, and mix with water to create bubbles. Apply all over outside the hidden area and then rinse with clean water. It can be used as often as needed.
