

Nutriga Canza

(Dietary Supplement Product)
(NUTRINAL (TM))

“Prevention is better than cure.”

Prevention + Cure 

Nutraceuticals refer to nutrients derived from food sources with health benefits.

Nutraceuticals are the hybrid of “Nutrition” from food and “Pharmaceutical” from medicine.

Nutraceuticals are defined as a “food, or parts of a food, that provide medical or health benefits including the prevention and treatment of disease”

according to Dr. Stephen De Felice – the Founder and Chairman of the Foundation for Innovation in Medicine (FIM).

Nutrients 

- Low efficiency
- Weak results
- No effect of physical intervention
- Prevent some diseases
- Long-term results
- Limited empirical evidence

Pharmaceuticals 

- High efficiency
- Targeted therapy
- With effect of specific physical intervention
- Cure some diseases
- Short-term results
- Massive empirical evidence

Prevent Risks Of Cancers
Reduce severity during the spread of metastatic cancer cells

Boost Immunity
Rich in antioxidants

Reduce Inflammation
Help reduce infection

Cause of Cancer

Caused by abnormalities of cells in the body that grow abnormally until form a lump. It will spread to nearby organs through the blood or lymphatic system.

Normal cell

Normal DNA

Abnormal DNA

Cancer cell

Abnormal growth

Accumulation of Cancer cells

Cancer cells that spread into bloodstream or the lymph nodes

Cancer cells that spread into other body parts

4 Stages of Cancer

- **Stage 1 :** The tumor is only found in the cells where it started. It has not spread to any surrounding tissue.
- **Stage 2 :** Tumors begin to be larger and spread within tissues or organs
- **Stage 3 :** Cancerous lumps or larger lesions spread to nearby organs or invaded nearby lymph nodes
- **Stage 4 :** The cancerous lump or lesion is very huge and spread to lymph nodes. Spread into the bloodstream to distant organs throughout the body

Cause of Cancer

Key Ingredients

PLU KAOW

found in the Himalayas, India, China, South Korea, Vietnam, Japan and the Northern region of Thailand.

- It helps reduce risk of cancer
 - It contains Quercetin - a flavonoid that helps inhibit cancer cell growth.
- Anti-inflammatory
 - More than 300 types of Essential Oil in Plu Kaow which has anti-inflammatory effect.
- Antioxidant
- It helps inhibit platelet aggregation.

COENZYME Q10

It is from Japan which has Vitamin-like properties. It has the effect of helping to transport electrons and helps for the energy production of cells in the body. Other than that, it also stimulates the functions of various systems in the body. It is found in the most energy-hungry organs such as the heart, kidneys, liver and pancreas.

- Helps cells to produce energy and reduce cell damage caused by certain chemotherapy drugs.
- Helps reduce the risk of cancer
- Helps boost the immune system
- Helps reduce inflammation.

BETA-CAROTENE 10%

It is a precursor to the synthesis of vitamin A. It helps to strengthen the immune system. Beta-carotene is consisted in vegetables, and fruits such as orange, pumpkins, carrots and baby corn

- Helps reduce risk of cancer
- Acts as an antioxidant
- Slow down the deterioration of the retina

TOMATO

has anti-cancer properties. It is rich in Carotenoids including α -carotene, β -carotene, lycopene, and lutein – the antioxidants that are mostly found in red and orange tomatoes. It helps reduce cancer cell growth, especially in prostate cancer, colon cancer, gastrointestinal cancer, breast cancer and lung cancer

- Helps reduce high blood pressure
- Helps prevent gallstones
- Helps brighten skin
- Helps inhibit growth of cancer cells
- Helps boost immune system
- Helps prevent cells from becoming cancerous cells

GREEN TEA

Contains epigallocatechin-3-gallate (EGCG), an important catechin group. which is a flavonoid found in green tea that helps reduce risk of cancer, reduce inflammation and act as an antioxidant

- Helps reduce risk of cancer
- Helps reduce inflammation
- Antioxidant

VITAMIN D3

It is essential for maintaining healthy bones and teeth. It also protects against a range of diseases and conditions.

- Helps reduce risk of cancer
- Helps boost the immunity system after surgery
- Helps absorb calcium in the body to strengthen bones.
