

Benfite'

NATURAL CARE

Oral Care Products for your
Fresh Breath and Clean Teeth

Why?...

The older we get, the worse breath we have!

Step 2

Step 1

Step 3

3 steps to improve your Oral Health & Hygiene

1. Start using Benfite' Natural Care Toothpaste
2. Use Benfite' Natural Care Mouthwash to freshen your breath
3. Give you Total Fresh Breath & Boost All-Day Confidence

When you turn 30, our mouth gets dryer caused by salivary glands problems, resulting in the build-up of oral bacteria "plaque" - a sticky stain on your teeth

* "Plaque" is the bacterial colorless, sticky film caused by sulfur-producing bacteria that normally live on the surface of the teeth, tongue, and in your throat. If not removed, it can cause Halitosis (bad breath).

Clear all bad breath problems

Body Cheer Benfite' Natural Care Toothpaste

DuoPower of Andrographis Extract & Fingerroot Extract

- Help reduce inflammation caused by oral bacteria with Thai herbs
- Treat and help prevent tooth decay and gum disease
- Help reduce bad breath
- Help restore tooth enamel

WHAT CAUSES MOUTH ODOR?

ORAL FACTORS

OTHER FACTORS

KEY INGREDIENTS

• HELP REDUCE INFLAMMATION CAUSED BY ORAL BACTERIA

- ANDROGRAPHIS EXTRACT

Anti-inflammatory effect helps prevent the bacteria growth

- FINGERROOT EXTRACT

Anti-bacterial effect helps treat and restore oral health

- ISOPROPYL METHYLPHENOL (IPMP)

Natural extract from Thyme has antiseptic properties to control inflammation and helps reduce oral odor

• REDUCE PLAQUE BUILDUP

- TEA TREE OIL

Anti-bacterial effect helps reduce plaque - biofilm accumulated in your mouth, especially on your tooth surface and tongue

• HELP REDUCE BAD BREATH

- PEPPERMINT OIL

Anti-bacterial effect with Icy Fresh cool Mint Aroma

• HELP REDUCE TOOTH DECAY

- SODIUM FLUORIDE

Main component of tooth enamel needed to help prevent tooth decay

• HELP RESTORE GUM HEALTH

- CINNAMON EXTRACT

Contains oral antiseptic benefits

• HELP TREAT TOOTH ENAMEL EROSION

- CALCIUM LACTATE

Only brushing your teeth is
“not the solution”

Benfite!
NATURAL CARE MOUTH WASH

- Total Clean
- Confident
- Fresh Cool Breath

Halitosis (bad breath) is mostly caused by sulfur-producing bacteria that accumulate from food debris. The oral bacteria usually live on the tooth surface, tongue, and throat.

Mouth wash
helps control bad breath
and reduce cavities.

Body Cheer Benfite' Natural Care Mouth Wash

MOUTH WASH

- ✓ Help reduce bacteria and plaque buildup
- ✓ Help freshen bad breath
- ✓ Help prevent cavities and restore gum health

KEY INGREDIENTS

• HELP REDUCE BACTERIA AND PLAQUE BUILD UP

- ANDROGRAPHIS EXTRACT

Thai herb is known for centuries for its anti-inflammatory properties. It helps boost the body's immune system. Andrographis extract has been tested and found with *Streptococcus mutans* that helps control antibacterial activity that causes plaque buildup.

- FINGERROOT EXTRACT

It has anti-bacterial properties in the mouth and throat. According to fingerroot extract contains an important substance, named Panduratin A which helps prevent plaque or biofilm caused by bacteria that further leads to tooth decay and unflavored breath smell.

• FRESHEN YOUR BREATH

- PEPPERMINT OIL

- Contain anti-bacterial properties and give icy cool mint to your breath
- Wake up feeling fresh and energized

• KEEP YOUR TOOTH AND GUM HEALTHY

- CINNAMON EXTRACT

Its properties are as follows:

- Help reduce bacteria growth in the throat
- Help relieve toothache
- Help maintain tooth and gum health

• HELP RESTORE TOOTH ENAMEL HEALTH

- CALCIUM LACTATE

- It helps make up tooth enamel, along with bone and dentine. Strong tooth enamel essentially assists in protecting the subsequent pulp cavity and dentine from being damaged.

• HELP PREVENT CAVITIES

- FLUORIDE

- Fluoride is one of the most powerful minerals to help prevent tooth decay by making the tooth enamel more resistant to the attacking acids.
- It helps promote mineralization.
- As a result, it helps prevent mineral loss, which can lead to signs of tooth decay such as white spots and cavities.

DUO POWER

TO HELP REDUCE BACTERIA AND PLAQUE BUILD UP

1. ANDROGRAPHIS EXTRACT

Thai herb is known for centuries for its anti-inflammatory properties. It helps boost the body's immune system. Andrographis extract has been tested and found with *Streptococcus mutans* that helps control antibacterial activity that causes plaque buildup.

2. FINGERROOT EXTRACT

It has anti-bacterial properties in the mouth and throat. According to fingerroot extract contains an important substance, named Panduratin A which helps prevent plaque or biofilm caused by bacteria that further leads to tooth decay and unflavored breath smell.

KEY INGREDIENTS

DEOPLEX ORGANIC

(imported from USA)
Natural deodorant is a safe and effective odor neutralization based on fermentation technology. It neutralizes odors caused by perspiration, strong food smell, and cigarette smoke.

PROPOLIS

(imported from USA)
Natural propolis extract helps relieve inflammation, infections, swelling symptoms in the mouth and throat, such as sore throat, mouth ulcers, and gingivitis (gum disease).

XYLITOL

It helps create a neutral pH in the mouth to prevent bacteria from sticking to the teeth and gumline, so it helps prevent new cavities and can reverse tooth decay that has already occurred.

CHAMOMILE EXTRACT

It has been used for centuries as an anti-inflammatory, antioxidant, Mild Astringent, and healing medicine.

GUAVA LEAF EXTRACT

(imported from France)
Guava leaf contains bioactive substances. Guava leaf is also rich in tannins that include antiseptic properties to prevent oral infections that can cause bad breath

SAGE EXTRACT

(imported from France)
It helps neutralize mouth odors due to its essential and antibacterial properties. It also freshens up or heals mouth sores that cause bad breath.

PEPPERMINT ES. OIL

Peppermint oil contains anti-bacterial properties, having icy cool mint to freshen up the breath.

SPEARMINT OIL

Spearmint helps improve oral and dental health due to its anti-inflammatory and antibacterial properties.

MINT OIL

Mint oil gives fresh breath.

ANISE OIL

Anise oil is often known to remove bacteria in the mouth that causes plaque and gum infections.

THYME OIL

Thyme oil has long been used as a remedy for bad breath and the prevention of gingivitis and gum disease.

PINE OIL

Pine oil is an effective chlorhexidine alternative that acts as an antimicrobial agent and prevents plaque buildup.

EUCALYPTUS OIL

Eucalyptus oil contains antibacterial properties, often used as an antiseptic to treat colds, sore throats, and coughs.
