

PURAMAG

Innovation for Life

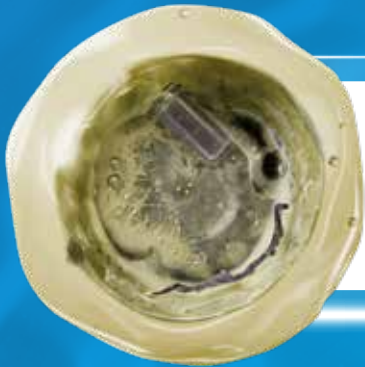

Does your home encounter these problems?

Dirty Water

Dirt, sand and debris that makes the water cloudy

Smelly Water

Abnormal color and chemicals such as chlorine smell from the water system

Hard Water

It can cause scale buildup in appliances such as shower heads, washing machines, or even cause skin allergies.

If the answer is "yes"

Puramag is here to solve these problems for you.

Which Puramag is right for you?

Puramag Inline Filter PP filter

It is a PP (Polypropylene) type filter, suitable for those who want **convenience and value for money** in basic water filtration.

Helps **reduce large impurities in water** before use and **extends the life** of various appliances

No need to worry about maintenance or filter cleaning
Just **replace the entire piece** when it reaches its lifespan!

1 step Puramag Filter PP Filter

Used to **filter dust, sediment and large dirt** from water, similar to Puramag Inline Filter

Suitable for homes that use tap water or groundwater that **often have sediment or turbidity problems.**

It is **worthwhile in the long run** because the cost of replacing the filter is cheap.

Which Puramag is right for you?

2 steps Puramag Filter PP Filter/Carbon

In addition to sediment filtration it also adds another layer of chemical filtration.

Suitable for households that have problems with cloudy water, odor or color and want to improve the quality of water without investing too much.

3 steps Puramag Filter PP Filter/Carbon/Resin

Complete filtering of sediment, odor and hardness

Suitable for customers who prioritize "Complete water filtration"

it helps reduce maintenance costs in the long run and truly meets the health needs.

1

Pre-filter, reducing burden on the primary filter

- Capture dust, sediment, sand and limestone in water
- Reduces water turbidity and removes large impurities.
- Helps extend the life of the filter system and provides better water quality.
- Helps to purify water before entering Alkamag

Alkamag "Add minerals to enhance alkalinity and filter thoroughly"

- Add important minerals such as calcium and magnesium.
- Adds mild alkaline properties (pH Balance) to help balance the body.
- Fine filter captures bacteria down to 0.01 microns.
